CONTACT INFORMATION	Department of Economics University of North Carolina Greensboro Greensboro, P.O. Box 26170 North Carolina 27402, USA	+1(336)587-2655 s_chakr2@uncg.edu satyaki4.github.io
RESEARCH INTERESTS	Economics of innovation, Applied microeconomics	
EDUCATION	University of North Carolina Greensboro, North Carolina, USA Ph.D. Student in Economics, 2019-Present (Expected Spring 2023) Dissertation title: The America Invents Act and innovation by small entities Gokhale Institute of Politics and Economics, Maharashtra, India M.Sc. in Economics, 2014-2016 Ramakrishna Mission Vidyamandira, West Bengal, India B.Sc. in Economics, 2011-2014	
JOB MARKET PAPER	<i>The America Invents Act and innovation by small entities</i> , (2022). Working paper, University of North Carolina Greensboro This paper studies patenting activity by small U.S. entities before and after the passage of the Leahy-Smith America Invents Act (AIA) of 2011 which changed the patenting rule in the United States from a first-to-invent to a first-inventor-to-file. The AIA's goals were to encourage patenting and provide certainty by curbing litigation. Contrary to the AIA's intentions, the results indicate a decline in patenting activity post-AIA for all entities, and a widened gap between the small and large entities when compared to the pre-AIA period. Moreover, entities with a greater exposure to litigation drop their patenting activity as compared to the entities with a lower exposure, and among the exposed, the small entities report a further drop in their activity. Prior to the AIA, entities had the benefit of flexibility on when to file for patents but this benefit came at a cost; it created uncertainty in an atmosphere of litigative behavior about the date of the invention. To check litigation, the AIA encouraged early disclosure of inventions, but this added to the already constrained budget of the small entities. This paper contributes in the following way: first, studies the effects of the AIA on small entities and empirically tests its predictions laid out prior to the legislation's enactment, and second, adds clarity to the understanding of the costs and benefits that the smaller entities face while innovating and their differences with the larger entities.	
WORKING PAPERS	<i>Patents' time to grant - A study of China and India</i> , (2021). Working paper, India Development Foundation and University of Gothenburg, with Gangopadhyay, S., & Mavruk, T. (Submitted) <i>Illiteracy and exclusion: Evidence from Women's Adult Literacy Programme in India</i> , (2018). Working paper, India Development Foundation, with Chadha, N.	
WORK IN PROGRESS	<i>Monetary policy shocks and innovation</i> , (2022). Working paper, University of North Carolina at Greensboro, with Moreland, T.
