CONTACT INFORMATION	Department of Economics University of North Carolina Greensboro Greensboro, P.O. Box 26170 North Carolina 27402, USA	+1(336)587-2655 s_chakr2@uncg.edu schakravarty@elon.edu satyaki4.github.io
RESEARCH INTERESTS	Economics of innovation, Applied microeconomics, Industrial organization	
EDUCATION	University of North Carolina Greensboro, North Carolina Ph.D. Student in Economics, 2019 - Present (Expected Spring 2024) Dissertation title: The America Invents Act and innovation by small entities Gokhale Institute of Politics and Economics, Pune M.Sc. in Economics, 2014 - 2016 Ramakrishna Mission Vidyamandira, Howrah B.Sc. in Economics, 2011 - 2014	
EMPLOYMENT	Elon University, NC Visiting Assistant Professor of Economics, 2023 - Present India Development Foundation, Gurugram Research Assistant, 2016 - 2019	
JOB MARKET PAPER	<i>The America Invents Act and innovation by small entities</i> , (2023). Working paper, UNC Greensboro This paper studies patenting activity by small U.S. entities before and after the passage of the Leahy-Smith America Invents Act (AIA) of 2011 which changed the patenting rule in the United States from a first-to-invent to a first-inventor-to-file. The AIA's goals were to encourage patenting and provide certainty by curbing litigation. Contrary to the AIA's intentions, the results indicate a decline in patenting activity post-AIA for all entities, and a widened gap between the small and large entities compared to the pre-AIA period. Further, an increase in exposure to litigation results in a drop in patents, but the rate of drop stalls post-AIA. Prior to the AIA, entities had the benefit of flexibility on when to file for patents but this benefit came at a cost; it created uncertainty in an atmosphere of litigative behavior about the date of the invention. To check litigation, the AIA rewarded disclosure of inventions, but this added to the already constrained budget of the small entities. This paper contributes to — first, studying the effects of the AIA on small entities and empirically testing the predictions laid out prior to the legislation's enactment, and second, adding clarity to the understanding of the costs and benefits that the smaller entities face while innovating and their differences with the larger entities.	
WORKING PAPERS	<i>Is there a home bias in the time taken to grant patents in India?</i> , (2023). Working paper, with Gangopadhyay, S., & Mavruk, T. (Submitted) <i>Geography of innovation in India</i> , (2023). Working paper, with Chadha, N.
